# Certifications.

At NSELED quality plays a central role. For this reason we have set **strict quality standards** which are **monitored throughout the entire supply chain**. From the design of each LED screen to the production and assembly of each item, to sales, shipping procedures, after-sale assistance. We like to guarantee high performance and high efficiency to all our customers.

Furthermore, **NSELED LED displays have passed the tests of the most important certifications on the international scene:**

**Mission.** Providing our customers with innovative, high-performance, easy-to-use and cost-effective Digital Signage and LED display solutions.

# About.

NSELED Europe is the branch of NSELED in Europe and was born from the friendship between Simon Lan, the founder of NSELED China, and Daniele Rocca, an entrepreneur in the digital printing sector always on the hunt for novelties.

The two meet at a fair in Amsterdam. Daniele, intrigued, decides to invest in these LED displays for his business. In a short time, the demand for digital signage and Totems was such that Daniele proposed to Simon to create a **branch entirely dedicated to the European market**, a mature market, accustomed to certain times and efficient services.

To offer a **superior quality customer experience**, NSELED Europe sets up the **Milan** headquarters, with a **large warehouse** that guarantees **rapid and safe deliveries at low costs**, and a **showroom**, the NSELED European Sample Center, where the customer is welcomed by the team and comes into contact with the products to directly evaluate their quality before purchasing.

Thanks to the constant relationship with the Parent Company, NSELED Europe offers maximum technical expertise just a few kilometers away!

# 01. Indoor Totem

Scan or **TAP** the **QR CODE** to view the **full product**.

The NSELED indoor totem is a modular and versatile LED display, specifically designed for advertising communication within indoor spaces.

Equipped with WIFI, USB, HDMI, and wired network connectivity options, this innovative display offers users the flexibility to manage content uploads from either a computer or a smartphone. Moreover, the LED totem display can be seamlessly integrated with other units, creating an impressive, unified platform for showcasing videos, images, and text on a grand scale.

Our Totems are designed to be user-friendly: no complicated setting to fix, no new devices to buy to have a thorough experience, no particular skills needed to be capable of using them.

You just have to plug them in and they are good to go!

# MULTIPLE INSTALLATION METHOD

# 02. Outdoor Totem

Waterproof

Scan or **TAP** the **QR CODE**  
to view the **full product**.

The Outdoor Totem is an LED screen suitable for outdoor use. As the outdoor version of the best-selling NSELED Indoor Totem, it shares with the latter the ability to be connected to other units to create a single large screen.

It is composed of an aluminum cabinet that provides exceptional lightness and maneuverability, allowing it to be easily moved wherever needed.

Durable and waterproof, this LED display is versatile and can be used in various applications, regardless of environmental conditions.

---

## Stable Performance

Wide operating temperature range  
(-40°C - +75°C)

Water-proof

Quality control check before shipping

---

# EXTERNAL DEVICE COMPATIBLE

To achieve a better advertising effect, Totem is designed to be connected with the speaker. Totem can also support interactive functions (customizable).

Connect the external light sensor to automatically adjust the screen brightness according to the environment > Energy Saving

Connect with the speaker > Make Your Ads Impressive And Unforgettable

Support interactive function(customizable) > Better Advertising Effect

## Smart Control

- Synchronous & Asynchronous Dual-mode Media Player
- Real-time Zoom In And Out
- 8 GB memory
- Supports USB expansion

NSELED uses aviation plugs to better protect the ports

# Fine pitch LED display

Scan or **TAP** the **QR CODE**  
to view the **full product**.

Fine pitch LED displays are LED displays with LED point spacing below 1.9mm. Thanks to the improvement of LED display manufacturing technology, the resolution of traditional LED displays has been significantly improved: these advanced LED displays offer a superior alternative to LCD video displays.

They have become the top choice for various settings, including shopping malls, meeting rooms, central control rooms, television studios, and enclosed branding and display applications.

## Display Advantages

One of the key advantages of fine-pitch LED displays lies in their higher pixel density and brightness, providing a remarkable visual experience. The displays boast a high refresh rate and dynamic contrast, ensuring optimal visual comfort and image quality. As a result, they meet the increasing demand for greater definition and a closer viewing distance.

Finer pixel pitch means more pixels can fit into the same physical size, increasing pixel density and resolution.

# Display Advantages

## Seamless Splicing

With seamless splicing and low energy consumption, small pitch LED displays can meet the needs of industries with high requirements for picture quality.

## High Stability

Once completely installed, they guarantee stable and excellent visual performances. Great way to advertise your business services and brand items.

## Long Lifespan

Overall NSE fine pitch LED display provides a long lifespan and excellent quality. They could last between 60.000 to 100.000 hours.

# 04. U Slim Wall Mounted LED display

Only 25 mm thick!

Ditch the bulky displays and embrace the sleek elegance of the NSELED ultra-slim wall-mounted LED display. Its transformative design, 50% lighter than comparable products, seamlessly blends into your surroundings, without compromising on visual brilliance. Immerse yourself in stunning visuals with a cinematic 16:9 aspect ratio that delivers an unparalleled viewing experience.

- Fine pixel pitch available 1.25 mm, 1.56 mm, 1.875 mm
- 16:9 Golden Ratio
- Advanced UHD 2k, 4k, 8k, Experience
- Smart LED module
- Smart management system
- Dust-proof, moisture-proof, corrosion-proof
- Full Front Service

At just 25mm thick, the Ultra Slim LEDwall is a fraction of the size of traditional LED displays. This makes it ideal for installation in tight spaces, such as retail displays or museum exhibits.

The Ultra Slim LEDwall is also lighter than other displays, making it easier to transport and install.

16:9

600 mm x 337.5 mm

### 16:9 Golden Ratio

Standard 27.5" Size

FHD/4K Pixel to Pixel Resolutions

These modules allow reproducing the 16:9 aspect ratio at any size

### High protection HD LED display

Water-proof, dust-proof, anti-collision, corrosion proof.

### Front and Rear Maintenance Design

Our LED screens offer both front and rear maintenance access, giving you the flexibility and efficiency you need to keep your LED screens running smoothly.

## Rental LED display RS Series

---

Our lightweight and easy-to-install rental LED displays are perfect for a variety of indoor and outdoor events. They are portable, quick to set up and take down, and feature high resolution and color contrast. The RS Series is a popular choice for presentations, concerts, sports, exhibitions, weddings, and more.

With multiple installation methods and a quick and simple assembly mechanism, the RS Series is the ideal solution for rental applications. You can recover your investment in a few events, making the RS Series a cost-effective option.

The RS Series offers front and rear serviceable screens in 1.9, 2.976, 3.91, and 4.81mm pixel pitches. This product line perfectly combines versatility and economic solutions for indoor and outdoor applications, ensuring the high-quality images you expect from NSELED.

# Rental LED display - RX series

The RX series boasts a user-friendly modular design, making on-site assembly a breeze. These cabinets, both portable and flexible, allow for creative designs of any size or shape.

Mix and match the standard cabinet sizes of 500x500mm and 500x1000mm effortlessly to tailor them to various projects and shades.

Crafted from ultra-lightweight die-casting aluminum with remarkable precision in splicing, the system maintains an ultra-thin profile of just 75mm. Enjoy easy transport and unparalleled portability!

# 06. Outdoor Signage

---

Scan or **TAP** the **QR CODE** to view the **full product**.

Easy to use, NSELED screens are a true marketing tool and allow the conversion of online and social communication investments into in-store communication, enhancing the in-store experience.

Investing in an LED wall is essential to promote your business in an engaging manner, attracting the attention of passersby, improving your brand's visibility, and creating a lasting impact in the era of digital signage.

- Brightness over 6000 nits
- High chromatic contrast
- Waterproof and resistant to weather conditions
- Powder coating
- Aluminum cabinet
- Optimal heat dissipation
- Perfect impermeability

#### **MODULAR and CUSTOMIZABLE**

The modularity of NSELED LED solutions allows for creating various configurations and adapting to all contexts.

# NSELED Standard Controllers

HD A4 is a Player controller with 8GB of internal memory. Through the HD Player software, it is possible to manage videos, photos, texts, etc. If configured, it connects to the internet. It offers the possibility of managing the entire system remotely.

- Synchronous and asynchronous communication
- Autoscaling
- Coordinated management of 2.3 million pixels
- Wi-Fi connection, LAN connection.
- Optionally support 4G and remote control in cloud.

# 07. OTV series

**ENERGY  
SAVING** 

Scan or **TAP** the **QR CODE** to view the **full product**.

The OTV Series is what everybody is looking for these days: high performance at a minimum energy consumption with a revolutionary structure.

Minimalistic and practical, OTV boasts full front&rear services and an essential modular design, ultra slim and lightweight (in aluminum) for faster and more costeffective transport and an easier installation process.

The “all-in-one-box” cable design simplifies electric connections and offers a more stable performance. But OTV Series’ main feature is the minimized energy consumption: the heat sink design for module chassis and power supply unit improves heat dissipation considerably, optimizing energy consumption.

## Curved Installation

The LED module and cabinet are with 45° bevels

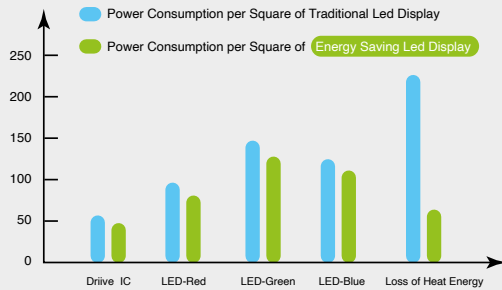

Series 960

Series 1000

# ENERGY SAVING

The new OTV Series offers the possibility of a direct application to walls: being wall-mounted directly, OTS Series halves the installation time, reduces the occasions of mistakes thanks to positioning aids and improves planarity.

- Front and rear maintenance
- IP65 waterproof
- Extra brightness on request: up to 10.000 NITs
- All in one installation

series 960

series 1000

# 08. Transparent LED display

Scan or **TAP** the **QR CODE** to view the **full product**.

The transparent NSELED screen is an LED display with transparency of up to 80%.

It can be positioned in a window or a showcase without sacrificing natural light in the space. The support is designed to hold the integrated LEDs without obstructing the view: thanks to the See-Through Effect, the graphics appear suspended in the void, while the colours, brightness, and contrasts remain typical of NSELED. The transparent LED display is also suitable for the “Glass Wall” installation, meaning it can cover the entire face of a building without hindering the passage of light to the interior spaces. The display can compete with direct sunlight during the peak hours of the day.

## **Easy Installation**

Modular design makes it easy to assemble and install the cabinet.

## **Convenient Maintenance**

Simple operation, modules can be replaced individually, reducing maintenance costs.

## **High Stability**

New structure to meet the requirements of hoisting, standing, indoor and outdoor use.

## **Diverse Controls**

Remote cluster control for easy control of single and multiple displays simultaneously.

# 09. Flexible LED display

---

Scan or **TAP** the **QR CODE**  
to view the **full product**.

## High Image Quality & Perfect Visual Enjoyment

The flexible LED screen available 2mm, 2.5mm, 3mm, and 4mm resolutions offers a better-quality image with high refresh rate, enhancing contrast, providing color uniformity and superior black levels.

Also, the Flexible LED panel because of its special shape design, gives audiences a perfect visual enjoyment, favored by the majority of customers.

---

## Display Advantages

- 1) High flexibility: It can be made in any size and shape for creative installations.
- 2) Easy to splice: Magnet design LED panel makes the screen easy to assemble and disassemble.
- 3) Front maintenance: It is effortless to maintain and replace by end-users.
- 4) Lightweight: Saving 50% shipping and installation costs.

Its RGB LED diodes are not only energy-saving, but they also have excellent performance while saving energy.

# showcase.

Digital signs offer unparalleled flexibility. It's possible to update content in real-time, adapting it to various promotions, events, or seasons.

## Connectivity

It is possible to upload content in the following ways:

LAN • Through a dedicated Ethernet port.

WI-FI • Via AP or corporate Wi-Fi.

USB • Using a Pen Drive.

HDMI • For real-time content.

AUDIO • Connect the kiosk to audio speakers using a 3.5mm jack.

CLOUD • Request a CLOUD account to upload content remotely.

We offer a cloud storage service with servers located in Europe, a valuable choice for security, privacy, performance, and regulatory compliance.

You will be able to manage one or more units simultaneously.

NSELED is a leading manufacturer that provides one-stop LED display solutions and services. We provide installation assistance, after-sales support, and a 2 years warranty to assure that we meet your needs.

## Services

- Technical assistance
- One-time training
- Content management software
- App Android e IOS

# Thank you.

The logo for Nisse LED features the word "Nisse" in a bold, blue, sans-serif font. The letters "N", "S", and "E" are significantly larger than "i" and "s". The word "LED" is written in a smaller, blue, sans-serif font and is positioned within the lower right portion of the "S".
